PROFILE SUMMARY

Python Developer at EY GDS with close to 5 **years** of experience working on agile projects. I simplify complex tasks and believe that **if it is structured, it can be automated**. My keen interest in Generative AI and its capabilities has allowed me to build and even win prizes by presenting my knowledge/work at places. So let me ask you, **what are we going to code and build next?**

WORK EXPERIENCE

EY GDS Senior Technology Consultant - II	Delhi NCR, India <i>December 2024 – Present</i>
- Developed a Cyber AI Package to detect PII, prompt injection, and jailbreak attempts using a combination of Microsoft Presidio, custom ML models with 97% accuracy, and pattern-based logic. - Designed solution architecture for a Policy Assessment Engine that utilizes OpenAI APIs to evaluate compliance narratives and automate risk scoring planned to reduce human effort by 50%. - Built an Agentic AI system to analyse ZScaler activity logs and generate real-time alerts based on user behaviour, enhancing cloud security posture monitoring. - Automated scripts for 20,000+ devices, utilizing CrowdStrike API and a combination of Python, AWS Lambda, EventBridge, and task schedulers.	

WIPRO TECHNOLOGIES Senior Python Developer	Bengaluru, India <i>September 2020 – December 2024</i>
- Built RAG-based KB article retrieval for multiple customers with Gemini and Claude 3 using Vertex AI and Amazon Bedrock respectively, utilized Spanner and MongoDB for storing Vector embeddings bringing down time of resolution by 30-40%. - Developed multiple Python solutions to fetch EC2 instances data using Lambda functions and fetch WAF reports data from S3 buckets with boto3, worked with Lambda, ECR, ECS, RDS, DynamoDB, Cloud Formation (CDK), AWS CLI etc. - Implemented multiple generative AI (Gen AI) based solutions, such as Chat Interface using Lang Chain, added query analysis for improving search quality for phrasing to LLMs while maintaining chat history and meeting notes summary generator. - Leveraged Amazon S3 for hosting files, managed with intelligent tiering, saving cost and going global in minutes. - Ensured consistent results using Python, Terraform and PowerShell by implementing across multiple clouds such as AWS and Azure for managing servers, creating infrastructures and deploying solutions, reducing deployment time by in range of 40-50%. - As a senior developer provided feedback, mentored and guided colleagues and new joiners for smooth transition in projects, and authored white papers and SOPs for simplifying the DevOps process.	

Projects

Automation Generator (Python, Gemini, Google Cloud, Streamlit) - Link
<i>PDF Summarization, Search Base using MongoDB Atlas</i> <i>Generate Block Diagram, Prerequisites, Script.</i> <i>Expected to reduce manual efforts by 80-90% in Use case delivery.)</i>
Streamline Research using Google Cloud and Gemini (Python, Cloud Run, Docker, Streamlit)- Link
<i>This application to help you cut through the clutter and make informed decisions effortlessly.</i> <i>Using the power of Google Cloud’s Gemini Model, and a combination of python libraries like YouTube Transcript API and Streamlit, along with Firebase.</i>

EDUCATION

BITS Pilani Work Integrated Learning Programs (PG) <i>MTech in Computing Systems and Infrastructure</i>	Pilani, India
University of Delhi (UG) <i>Bachelor of Science Honors in Instrumentation</i>	Delhi, India

SKILLS & INTERESTS

Languages: Python, R, JavaScript, PowerShell, Shell Scripting, YAML, HTML5
Database: MongoDB, MySQL, Postgres, Redis
ML/DS Framework: React, Django (ORM), Flask, LangChain, Streamlit, Presidio
Cloud: AWS (Lambda, ECS, CDK), GCP (Vertex AI, Gemini), Azure, OCI, MongoDB Atlas,
DevOps: Linux, Ansible, Terraform, Jenkins, Docker, Kubernetes, Git, Azure DevOps, GitHub Actions
Soft Skill: Verbal and written communication, Problem-Solving, Adaptability, Creativity, Troubleshooting, Collaborative

CERTIFIED

[AWS AI Practitioner](#), [AWS Cloud Practitioner](#)
[Oracle Generative AI Professional](#), [MongoDB Atlas](#), [RedHat Linux](#), [Azure Fundamentals](#)
